

# Hartwell's Approved Raw Material Suppliers

(As of 10/10/2023)

As part of the supply chain controls exercised by Hartwell, our purchase orders for contract-deliverable hardware routinely invoke our QCI 29-14-1, *General Supplier Quality Requirements*, a section of which requires the use of certain controls for raw material stock being used by suppliers to build product to Hartwell data. One alternate means of control is the use of Hartwell-approved raw material suppliers, hence this listing which is periodically synchronized to reflect current rate material statuses in Hartwell quality management system.

If you are a supplier to Hartwell and have any questions on this topic, please refer them to the Hartwell buyer with whom you normally coordinate.
